Semi Auto Urine Strip Analyser

# UA 300

## Semi Auto Urine Strip Analyser

UA 300 Urine Analyser is highly reproducible, high speed microprocessor control instrument works on Artificial intelligence and computer vision technology for analysis of urine test strips. It has intuitive touch screen operation, large data storage and waste collection facility.

### Features

- Artificial intelligence + computer vision technology
- Touch screen operation
- Bi-directional interface
- Auto waste collection

### Technical Specifications

Analyser Type	Semi-Automatic
Methodology	Artificial intelligence + computer vision technology
Display	7" large screen display, touch screen operation
Throughput	514 samples/hour
Data Storage	Around millions test records. Facility to test result according to the record numbers
Strip Incubation Time	1 minute
Standard Strips	8, 9, 10, 14 Parameters (5 mm x 120 mm)
Communication and Interface	Reserved RS232, WIFI, network interface, external urine sediment analysis system, hospital management software (HIS, LIS)
Waste Disposable Capacity	Up to 200 Strips
Working Environment	Temperature 15-30° C, Humidity <85 %
Printing Method	Built-in high-speed thermal printer
Barcode Reader	Optional
Power Supply	AC 100~240V ± 10%, 50-60Hz, safe and reliable
Dimension	342mm (L) x 300mm (W) x 248mm(H)
Weight	≤5KG

Marketed In India By: \_\_\_\_\_
